# Privacy Statement

## 1. Introduction

Allianz cares about your personal data. Our mission is to ensure the Allianz' privacy strategy and framework enable our businesses to maintain the trust of customers, employees and other stakeholders in our handling of personal data. We are committed to the highest standards of data protection and privacy compliance by handling personal data responsibly, transparently, with due care and in a fair and lawful manner. We use it only for specified and legitimate purposes and only keep it for as long as is needed. We never share it with anyone who is not authorized to access it.

We strive to communicate honestly and openly about actions that involve the personal data we process. We in[illegible]tion into the design of our products (privacy by design) and take appropriate steps to protect personal data and keep it secure

On this page, we would like to introduce you to our Privacy framework and activities.

*"Trust is an integral part of Allianz's core values. We are committed to maintaining the trust of our employees, customers, and suppliers, and we believe that the protection and ethical use of data is important to achieve this."*

**Barbara Karuth-Zelle**
Member of the Board
Allianz SE

## 2. Privacy Principles at Allianz

**Lawfulness, Fairness, and Transparency**; We collect data only for a good reason, for example, if the individual has given their consent or to fulfil a contractual obligation. Individuals are informed in a clear manner how their data will be used.

**Purpose Limitation**; We limit the processing of personal data to only the purposes we've communicated to the individual.

**Data Minimisation**; We collect the smallest amount of data that is required to achieve the purposes stated.

**Accuracy**; Correct data is important to us, we have set up verification methods and provided channels for individuals to update their data with us.

**Storage Limitation**; Allianz has a standard for document management with retention schedules. We aim to o Skip to footer long as necessary.

**Integrity and Confidentiality**; We take the security of data seriously, implementing technical and organizational security measures to mitigate risks.

**Accountability**; Allianz maintains documentation on how, where, why, personal data is processed to ensure that it can be presented as evidence of our responsibilities to supervisory authorities.

## 3. Privacy Governance at Allianz

The Group Chief Privacy Officer reports directly to a Board Member and is supported by a team of 42 privacy professionals.

**>120 Privacy FTEs**

To ensure compliance throughout the organization, Allianz has over 120 Privacy FTEs all over the world.

**2,500 Privacy champions**

To further embed Privacy principles in the organization, the Privacy function is supported by 2,500 Privacy Champions

## 4. Allianz Sharing of Personal Data

- **Internal:** Allianz has establi[illegible]nd controls surrounding the processing of personal data[illegible]zed will be able to process such data.

Skip to footer

- **Binding Corporate Rules (BCRs)**: As Allianz is a large multinational company, there needs to be a mechanism to transfer personal data across borders while staying in compliance with EEA data privacy and protection laws and regulations. The Allianz Binding Corporate Rules ("BCRs") provides this mechanism and were approved by the national data protection authorities in the European Economic Area ("EEA"). These authorities include the lead data protection authority for the Allianz Group, the Bavarian Data Protection Authority ("BayLDA").
- **External**: For transfers of data outside the Allianz Group, Data Processing Agreements are required to ensure that the recipient has adequate data protection levels and measures in place.

## 5. Data Ethics

- Allianz strives to conduct data-driven business as a trustworthy and ethical partner to our customers. We have put a range of initiatives in place, such as the 2021 establishment of our Data Advisory Board. With top management represented among its membership, the DAB aims to elevate data ethics and selected data and analytics-related topics in the governance and decision-making processes of Allianz Group.
- Our approach includes implementing a responsible use of Artificial Intelligence (AI) in our business activities, going beyond compliance with all applicable laws and regulations such as the GDPR. We embed best practices by ensuring that our usage of AI systems is human centric.
- Our Allianz Practical Guidance for AI serves as a guide to our core principles for the responsible usage of AI: Transparency, Privacy and Data Governance, Human Agency and Control, Fairness and Non-Discrimination, and Accountability. We take a risk-based approach to implementing the appropriate level of human involvement in each AI use case which processes personal data via the Privacy and Ethics Impact Assessment. All relevant employees who develop or use AI solutions are trained on the Responsible AI approach taken in the Practical Guidance for AI.

## Some tips to give you even more protection

**Minimize** the personal data you provide.

**Carefully read privacy notices** and clarify points that are unclear.

**Make your data privacy choices** (opt-in/opt-out) regarding the use of your personal data.

**Use pseudonyms** whenever this is possible.

**Watch out for phishing attempts** (a type of social engineering where an attacker sends a fraudulent message designed to trick a person into revealing sensitive information to the attacker). How you can identify this:

- check the sender's e-mail address
- the overall message, whether there's any typos or suspicious links

**Keep up-to-date** on privacy developments and news to ensure you know your privacy rights.
